Tin Foil Printing

Printing Amazing Designs Using Tinfoil

What You Need

- Tinfoil
- Paint
- Paper (white or coloured)
- Paint brush

- Unroll a section of tinfoil and measure the length of tinfoil you will need by placing your white sheet of paper on top
- Tear the tinfoil to the size that you'll need. You can be generous with the tinfoil. Its better that the foil is bigger than the white paper rather than the other way around!

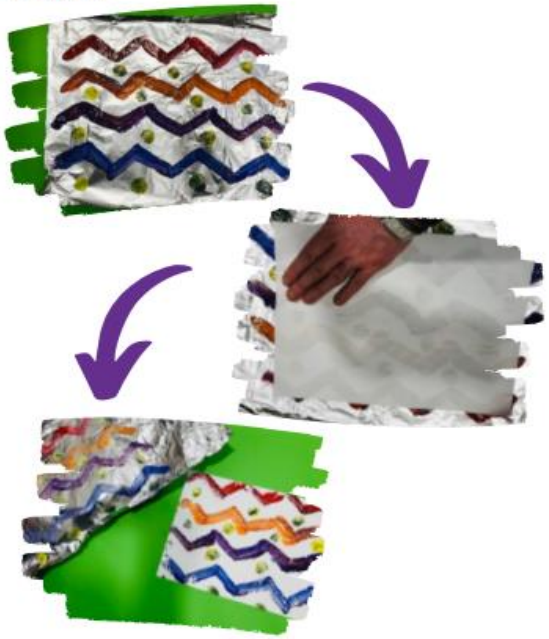
- Now let's get painting! Paint any design, image or picture on the tinfoil. Use all your colourful paints you have to get a bright and exciting result.
- Fill the tinfoil with your best and most imaginative painted creation!

- Now it's printing time! Place your white sheet carefully on top of your painted tinfoil design.

- Gently rub your hand over the white sheet to help get a really good print.

- Carefully and slowly lift your white sheet of paper off the tinfoil.

- Here is another example of a pattern I painted and printed using tinfoil print



- Now you can try it yourself and create some imaginative and different creations!
